

AccentrateTM supplements nutritional deficiencies that are known to be associated with ADHD to help manage symptoms. These nutrients must accumulate and incorporate in the brain before the benefits are noticed. Sometimes improvements are difficult to notice because they are gradual and occur over time. The chart below may be used to help document your child's changes in behavior.

How soon can you start to see improvement?

Symptoms	Never	Occasionally	Often	Very Often	
	0	1	2	3	

INATTENTION	<u>Start</u>	Week 2	Week 4	Week 6	Week 8	Week 10	<u>Week 12</u>

Feels overly guilty for mistakes							
Feels lonely or unwanted							
Relationship with parents							
Relationship with teachers							
Relationship with siblings							
Relationship with friends							
OVERALL SCHOOL PERFORMANCE							
OVERALL BEHAVIOR							

AccentrateTM takes a nutritional, healthy approach to managing ADHD through healing and not hurting now or in the future. It is unlikely that taking AccentrateTM for a month will alleviate all ADHD symptoms. It may be necessary to take AccentrateTM for a long period of time, until the brain's connections have fully matured.

Taking AccentrateTM in conjunction with medication may improve the effectiveness of the medication¹ as well as keep the dosages as low as possible. Please consult with your medical practitioner about treatment.
